

ZCLPA TECHNICAL DOCUMENTATION

FEATURES

- 3 analog/digital inputs.
- 10 Logic functions.
- · Total data saving on KNX bus failure.
- Integrated KNX BCU.
- Dimensions 39 x 39 x 14mm.
- Can be mounted within distribution boxes, juction boxes or wall back boxes.
- Conformity with the CE directives (CE-mark on the front side).

|--|-----------------------|---------------------------------|
| 4. Air conditioning equipment connection | | KNX connector |

Programming button: short press to set programming mode. If this button is held while plugging the device into the KNX bus, it enters the safe mode.

Programming LED: programming mode indicator (red). When the device enters the safe mode, it blinks (red) every half second. During the start-up (reset or after KNX bus failure) and if the device is not in safe mode, it emits a red flash.

| GENERAL SPECIFICATIONS | | | | | |
|-------------------------------|-----------------------|--|--|--|--|
| CONCEPT | | DESCRIPTION | | | |
| Type of device | Type of device | | Electric operation control devi | Electric operation control device | |
| Voltage (typical) | | al) | 29VDC SELV | 29VDC SELV | |
| KNX supply | Voltage range | | 2131VDC | | |
| | | Voltage | mA | mW | |
| | Maximum | 29VDC (typical) | 4.1 | 122,09 | |
| | consumption | 24VDC ¹ | 10 | 240 | |
| | Connection ty | pe | Typical TP1 bus connector fo | Typical TP1 bus connector for 0.80mm Ø rigid cable | |
| External power | External power supply | | Not required | | |
| Operation temperature | | 0°C +55°C | | | |
| Storage temp | Storage temperature | | -20°C +55°C | | |
| Operation humidity | | 5 95% (No condens.) | 5 95% (No condens.) | | |
| Storage humidity | | 5 95% (No condens.) | | | |
| Complementary characteristics | | Class B | Class B | | |
| Protection class | | III | III | | |
| Operation type | | Continuous operation | Continuous operation | | |
| Device action type | | Type 1 | | | |
| Electrical stress period | | Long | | | |
| Degree of protection | | IP20, clean environment | | | |
| Installation | | Independent device to be mounted in electrical panels, distribution boxes, | | | |
| | | | junction boxes or wall back boxes. It must not be installed inside the air | | |
| | | conditioning equipment. | | | |
| Minimum clea | | | Not required | | |
| Response on | KNX bus failure | | Data saving according to para | | |
| Response on KNX bus restart | | Data recovery according to parameterization | | | |
| Operation indicator | | | The programming LED indicates programming mode (red). | | |

| INPUTS SPECIFICATIONS AND CONNECTIONS | | |
|---------------------------------------|---|--|
| CONCEPT | DESCRIPTION | |
| Number of inputs | 3 | |
| Inputs per common | 3 | |
| Operation voltage | +3.3VDC in the common | |
| Operation current | 1mA @ 3.3VDC (per input) | |
| Switching type | Dry voltage contacts between input and common | |
| Connection method | Screw terminal block | |
| Cable cross-section | 0.2-1.0mm ² (DIN) / 26-16AWG (UL) | |
| Maximum cable length | 30m | |
| NTC probe length | 1.5m (up to 30m) | |
| NTC accuracy (@ 25°C) ² | ±0.5°C | |
| Temperature resolution | 0.1°C | |
| Maximum response time | 10ms | |

² For Zennio temperature probes.

INPUTS CONNECTION

Any combination of the following accessories is allowed in the inputs:

^{*} The micro switch number 2 in the ZN1IO-DETEC-P must be in Type B position to work properly.

^{**}May be a Zennio temperature probe or any NTC with known resistance values at three points in the range [-55, 150°C].

| AIR CONDITIONING EQUIPMENT SPECIFICATION AND CONNECTIONS | | | |
|--|---|--|--|
| CONCEPT | DESCRIPTION | | |
| Maximum cable length | 30m | | |
| Connection method | Screw terminal block | | |
| Cable cross-section | 0.2-1.0 mm ² (DIN) / 26-16AWG (UL) | | |

DIMENSIONS

SAFETY INSTRUCTIONS

- Installation should only be performed by qualified professionals according to the laws and regulations applicable in each country.
- Do not connect the mains voltage nor any other external voltage to any point of the KNX bus; it would represent a risk for the entire KNX system. The facility must have enough insulation between the mains (or auxiliary) voltage and the KNX bus or the wires of other accessories, in case of being installed.
- Once the device is installed (in the panel or box), it must not be accessible from outside.
- å Keep the device away from water and do not cover it with clothes, paper or any other material while in use.
 - The WEEE logo means that this device contains electronic parts and it must be properly disposed of by following the instructions at http://zennio.com/weee-regulation.
